No	D	E	F = D + E
	G = A + D	H = B + E	I = C + F

- **Chi-Square** – used to test for statistical significance. Answers the question, “Do we have a large enough sample to know our results are conclusive?”.
- **Heidke Skill Score** – used to test whether we are beating persistence or climatology.
- **Bias** – used to determine whether we are over-forecasting or under-forecasting.

Review

- HWD Strong-moderate skill overall
  - Still under forecasting (Trend item)
  - Need to review Climatology as a forecast tool and pay attention to terrain (upslope)
- TSTMS
  - Hit or Miss this time of year
  - Overall strong skill, misses were timing/placement based on model data
  - Need to prepare for increased activity
